Sun Shield Fund
Sunscreen for Kids with Albinism

ECM missionaries Wayne and Bonnie Hollyoak had an idea which became a reality. Instead of purchasing expensive sunscreen in Uganda or bringing it from the United State, why not produce ourselves? Thanks to their efforts and hard work, ECM is now waiting government approval of our **In His Care Sun Shield Cream**. Our primary goal is to economically produce the sunscreen cream for our own children and caregivers. Our secondary goal is to sell the cream to the greater community of children and adults with albinism in Uganda, thereby generating income for the ministry in Uganda.

Our goal is to raise **$11,000** in 2019-20 to produce and distribute at least 2000 units of sunscreen for children and adults with albinism.
